Litigation, Information Law & E-Discovery

MAY 1, 2013 • THREE CITIES • ONE DAY

Mark your calendar and plan to attend the inaugural Consortium on Litigation, Information Law & E-Discovery with multi-city collaborative panels connected live, via Cisco Telepresence, in New York, Chicago, and San Jose on May 1, 2013. Every panel in all three cities will have live speakers. Three unique time-linked panels will have speakers from all three cities.

The Consortium offers a revolutionary step in legal professional conferencing. For the first time ever, a distinguished and diverse faculty will convene in three separate cities to discuss a wide range of topics critical to professional development. Whether you’re a Corporate Counsel, General Counsel or Chief Executive, this consortium will provide unparalleled access to some of the most powerful industry leaders.

Driven by Cisco technology, the Consortium on Litigation, Information Law & E-Discovery will allow attendees to sharpen their knowledge about emerging trends and forces shaping the legal business. With telepresence technology, attendees will be fully immersed in the conference proceedings without the hassle and cost of travel. Thomson Reuters’ downtown headquarters at 195 Broadway will host the New York segment; while the Chicago Bar Association (321 S Plymouth Ct.) and Cisco Headquarters (170 West Tasman Drive) will anchor Chicago and San Jose, respectively.

Take this opportunity to network with your peers, industry leaders and corporate counsel as we discuss the critical issues posed by today’s tumultuous legal business environment and explore what firms are doing to position themselves for success.

KEY CONFERENCE BENEFITS:

Judges Meet the General Counsel Department
In the conference’s three city Telepresence highlight panel we connect the nation’s leading judges with the General Counsels from Global 500 organizations. Often presented with the barriers of courtroom dialogue, rarely do judges and GC’s have this sort of true, connected discussion. Key focuses of this panel will include proper presentation of cost and burden, protecting privilege, and commentary on Federal Rules reform.

Corporate IT Tech Meets Law Meets Information Governance
Recent demands legal and records management have placed on the information technology have created a hefty burden on CIO’s budget. From litigation hold to data remediation programs IT now plays a major role in the organizations liability calculations. This combination has caused a rebirth of records management to create programs of true information governance. Learn how these companies have broken down silos to construct a plan to win the InfoGov challenge.

Creating a Breach Response Plan
Data breach and information theft are the top concerns of General Counsel worldwide. A breach presents the fearful intersection of criminal conduct, infinite liability and PR mayhem. New legislation on Capitol Hill presents yet another complexity to this situation. Learn how these organizations are preparing for the attacks from both inside at out.

Local Sessions: Target City Noted

The escalating costs of legal and records management has placed a hefty burden on many CIOs’ budgets. From litigation hold to data remediation programs, the process of managing such records casts a significant shadow over organizational liability calculations. How can corporate leaders manage such costs, while ensuring the overall integrity of data? Join us as a national panel of experts details how to break down such barriers and construct a plan to help win the Information Governance challenge.

International Discovery: Special Connection to London Offices of SwissRe
Target City: Chicago, IL
The EU has recently expanded its enforcement of data protection laws like the Data Privacy Directive with a barrage of new rules and severe penalties. As a result, U.S. in-house corporate counsel are paying more attention to the challenges posed by international data transfers commonly encountered in e-discovery and elsewhere. The Panel, comprised of in-house counsel experienced in international matters and e-discovery, will address practical solutions to conflicting domestic and international data protection laws and how the Sedona International Principles may be applied to help resolve these dilemmas

Targeted Litigation Hold and Data Remediation
Target City: Chicago, IL
As e-mail has become the preferred platform for everything from water cooler chats to highly sensitive business plans and trade secrets, large corporations are becoming more concerned with over-preservation and limits of data storage. the risks presented with storing too much data. Learn how these corporate executives created defensible litigation hold plans that avoid the kitchen sink preservation burden.
Technology Assisted Review
Target City: San Jose, CA
Computer Assisted Review has received national attention from clients, cases, and service providers. Come hear the research about how these in-house firms and technology providers are saving millions on their budget (or helping others do the same) by implementing defensible processes backed by technology.

From Social Media to Bring Your Own Device: A New Era of Employment Law
Target City: San Jose, CA
Tag me! Or not. Employees are sharing more information about themselves on the internet than ever before. However, the proliferation of seemingly private data puts corporate employers in a stance to protect themselves from IP theft and employment risk. Come hear how several other corporations are deploying.

Technology Issues in Global Investigations and Litigation
Target City: New York, NY
From forensics examinations to expert testimony, law enforcement investigations can be the most disruptive type of matter for Fortune 500 organizations. Never-ending costs, pervasive public relations management, and possible criminal risk are all considerations when faced with an investigation. Hear how these executives have built response protocols that minimize risk to their organization.

Technology Assisted Review – Hosted by Kroll Ontrack
Target City: New York, NY
Computer Assisted Review has received national attention from clients, cases, and service providers. Come hear the research about how these in-house firms are saving millions by implementing defensible processes backed by technology.
